

PROJECT MANAGEMENT AND PROJECT MANAGER LEADERSHIP

PP-6

This training is for project team managers. It will help them to evolve their behavior as Project Managers in order to increase efficiency of the project team by increasing team performance and accountability and to create a relationship of trust with project stakeholders.

2 days

Target groups:

- Leaders, Managers
- Project Directors/Managers
- Project Buyers

Objectives and Results :

- ✓ Establish a systemic evaluation matrix on the project environment
- ✓ Give a dimension of excellence to the role of a project leader
- ✓ Expand trust and cohesion within the project team
- ✓ Accompany changes in time management
- ✓ Have keys to manage conflicts inherent to project management

Requirements :

- No specific requirements

Your trainer :

- Training is conducted by a team management and building expert.

Content and methodology of training:

Organize management of your projects:

- Understand management mode and influence of each player
- Measure complexity of a project
- Analyze project stakeholders and their influence
- Implement your management strategy
- Accompany change

Get to know yourself to develop your own leadership qualities:

- Awareness of your relational impact
- Identify your strengths and areas for development
- Develop your leadership and assertiveness

Communicate efficiently in a situation of project management:

- Master the basics of efficient communication
- Define a communication strategy

Build a highly productive project team:

- Changing from a "group of individuals" to a productive team
- Give sense, encourage individual and collective involvement
- Conflict management and difficult communication

The training is practice-oriented and customized to personal needs. It alternates methodological training and interaction between participants.
